

We are starting a radio station at our church in Cambridge, MN. The station will be unmanned 24 hour per day, 7 day a week station. This station will be non profit and will receive its signal from satellites. It will not be funded by any outside resources. If this measure is passed, it will require us to buy extra recording equipment and pay for someone to manage the station every day. If this measure is passed, we ask that there be an exception for stations such as ours.
